

PROCESS PARTS CLEANING LINE CARD				
AQUEOUS PARTS WASHER DETERGENTS		IMMERSION TANK / AGI-LIFT		
SPRAYDET S	Highly caustic liquid detergent for cleaning ferrous metals in spray cabinet machines.	101	Caustic based powder, ferrous metal safe, cleaner and rust stripper.	
	SPRAYDET RS	Highly caustic powdered detergent for cleaning ferrous metals in spray cabinet machines.	SEACLEAN 24	Highly caustic liquid formulated for cleaning and degreasing ferrous metals.
		14EX	Multi-metal safe, alkaline powder formulated with advanced in-process rust inhibitors and anti-foam agents for spray cabinet machines.	AQUA AL-RP
SPRAYDET EL	Highly concentrated, multi-metal safe, alkaline liquid formulated with in-process rust inhibitors, anti-foam agents, and NO HAP's or VOC's. Aerospace qualified. Leaves little to no residue on processed parts.		RUST INHIBITORS	
		571	In-process aqueous rust inhibitor for use on all metals.	
		577	In-process, inorganic, rust inhibitor designed for treatment of steel and iron parts.	
SPRAYDET CW	Highly concentrated, multi-metal safe, alkaline liquid engineered to remove synthetic cutting lubricants, oils, carbon deposits, cosmoline protective coatings, tenacious road film, and even printing inks from all surfaces.	578	In-process, inorganic, sodium molybdate free, rust inhibitor designed for treatment of steel, iron, and yellow metal parts.	
		ULTRASONIC DETERGENTS		
SPRAYDET TURBO CHARGE	Premium quality, Non-VOC, liquid power booster to be used as an additive to quickly and effectively attack baked on carbon, oil, grease, and all other contaminants that fall above and beyond normal cleaning thresholds.	AQUA UL	Aluminum safe alkaline liquid engineered specifically for ultrasonic washers. Safe on all metal and plastic surfaces.	
		SEACLEAN 125	Ferrous metal safe, heavy duty alkaline liquid engineered specifically for ultrasonic cleaning.	
FOUNTAIN STYLE PARTS WASHER DETERGENTS				
DEFOAMER O	Highly concentrated, non-silicone, liquid foam suppressant compatible and formulated for use with all Spraydet detergents when additional foam control is necessary.	AQUA FORCE	Multi-metal safe, pH neutral, liquid detergent for use in heated manual types of fountain style aqueous parts washers or "sink on a drum" type units.	
		AQUA SOLV II	Multi-metal safe, liquid detergent for use in manual types of fountain style aqueous parts washers or "sink on a drum" type units. Does not need to be heated.	
FOUNTAIN STYLE PARTS WASHER SOLVENTS				
		140HF	Penetrating solvent used in sink-on-drum or fountain style parts washers.
