

C&H 864A Once Thru Water Treatment

Product Description

C&H 864A Once Thru Water Treatment is a concentrated scale inhibitor and antifoulant intended for use in water heaters and heat exchangers as well as their transfer lines. Contains a combination of synthetic and organic sequestrants to keep heat exchange and water heater surfaces clean.

Performance Features

- Prevents scaling and fouling.
- Non-polluting with a very low toxicity
- Does NOT contain phosphates.
- Can be fed directly from product container.

Physical Specifications

Physical State	Liquid
Appearance	Blue
pH	5-6

Equipment Requirements

C&H 864A Once Thru Water Treatment should be pumped into feed line of direct contact water heaters by a diaphragm pump. Pulsatron pumps (LD54SA-VTC1) are available directly from Seacole. Please contact Seacole for further information and instructions.

Product Make-Up

C&H 864A Once Thru Water Treatment is a concentrated harness handler/scale control agent. Dilute to specified concentrations.

Concentration and Application Method

For treatment in an Industrial Water System Treatment use a dosing meter/pump. Seacole recommends using a Pulsatron pump (LD54SA-VTC1). Please follow the following settings while using a Pulsatron pump (LD54SA-VTC1). Please contact Seacole for additional information and recommendations.

Recommended Settings for Pulsatron Pump (LD54SA-VTC1)		
Hardness (Grains)	Hardness (PPM)	Pump Settings (Frequency – Stroke)
10-15	170-255	25-25
15-20	255-340	30-30
20-30	340-510	40-40
30-40	510-680	50-50
40-50	680-750	60-60
50-60	750-1020	70-70

For direct treatment to tanks add 1oz of C&H 864A Once Thru Water Treatment per 300-gallons to bulk holding tanks and boilers. Please contact Seacole for additional information and recommendations.
